

MOHD SAFEE

mohdsafee8400@gmail.com | +91-96283-28561 | Linkedin: mohdsafee7 | Github: mohdsafee7

Career Objective:

Computer Science undergraduate with backend-focused development experience in Node.js, Express, and MongoDB, along with strong foundations in Data Structures & Algorithms. Skilled in building REST APIs, authentication systems, and scalable web applications, with active use of AI tools to enhance productivity. Seeking an entry-level software engineering role to contribute to building efficient and scalable backend systems.

Academic Details:

Bachelor of Technology in Computer Science and Engineering	2023-Present
Pranveer Singh Institute of Technology, Kanpur	CGPA: 8.2 (Till 5 th Semester)
Intermediate (CBSE)	2021-2022
Sahu International School, Kabrai	Percentage: 84.6%
High School (CBSE)	2019-2020
Hind Angels Public School, Rath	Percentage: 81.6%

Technical Competencies:

Languages: C++, Python, JavaScript, SQL

Frontend: HTML, CSS, React.js, Tailwind CSS

Backend: Node.js, Express.js

Databases: MongoDB, PostgreSQL, MySQL

Tools & Platforms: Git, GitHub, VS Code, Postman, Thunder Client, JIRA, Docker (Basics)

AI & Productivity Tools: Claude Code, ChatGPT, GitHub Copilot – code generation, boilerplate automation

Core Subjects: Data Structures & Algorithms, Object Oriented Programming, Operating Systems, DBMS, Computer Networks

Projects:

Code Editor – AI-Powered Web IDE | React.js, Node.js, Express.js, WebSockets *Ongoing*

- Built a full-stack browser-based IDE using Monaco Editor with real-time code execution and multi-language support
- Implemented live collaboration using WebSockets with a Node.js/Express backend for session and user management
- Designed a responsive frontend with syntax highlighting, custom keybindings, and integrated terminal (xterm.js)
- Integrated AI-based code suggestions and chat assistance using Ollama; added OAuth login (Google, GitHub)
- Deployed the application for real-world usage and accessibility

AI-Powered Interview Prep & Resume Builder | React.js, Node.js, Express.js, Gemini API *Dec 2025 – Mar 2026*

- Developed a full-stack GenAI web application using MERN stack for interview preparation and resume optimization
- Implemented secure authentication using JWT with token-based access control
- Integrated Gemini API for resume analysis, skill gap detection, and personalized interview question generation
- Built dynamic PDF resume generation using Puppeteer for ATS-optimized resumes based on job descriptions
- Deployed the application for real-world usage and accessibility

URL Shortener | React.js, Node.js, Express.js, MongoDB, JWT *Aug 2025 – Dec 2025*

- Developed a scalable URL shortening service using MERN stack with modular backend architecture
- Designed RESTful APIs for URL creation, redirection, and lookup with unique hash generation and database indexing
- Structured backend using middleware, routing, and controllers for clean and maintainable code
- Implemented JWT-based authentication for secure access to protected routes
- Tested and validated APIs using Postman and Thunder Client
- Deployed the application for real-world usage and accessibility

Certifications:

- Claude Code in Action - Anthropic | 2026
- Node.js Backend Development (Beginner to Advanced) – Udemy | 2025
- Oracle Cloud Infrastructure AI Foundations Associate – Oracle | 2025
- 160 Days of DSA – GeeksforGeeks | 2025

Achievements:

- Solved 600+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks
- Participated in Jaipur Cybrathon 2K25 (GVSET), developed a full-stack web project collaboratively
